The Weed Nerds

SubCool420

Featuring Subcool & guests such as Kyle Kushman, Ed Rosenthal and Jorge Cervantes!

The Weed Nerds is a Culture-based Entertainment Show that appears pre-recorded bi-monthly on YouTube. Music, Humor, and Political Commentary plus field reporting make up this popular show for anyone that's 420 friendly. Maybe the best Cannabis Culture Show online today!

Surviving & Conquering Life and the Ever-Changing Cannabis Industry

I have been breeding Cannabis Seeds for 2 decades underground. I am proud to have survived the many changes in the industry and continue to offer you great genetics in today's new markets worldwide. Subcool Seeds (Previously TGAgenetics) was formed in 2017 after a fire destroyed my business, home and everything I owned except a stash of seeds and parent plants at other locations. Over 4 million seeds were lost in the Cobb fire. In 2018 the library of classic strains such as Jesus OG Kush and Cheese Quake were rebuilt and 13 new Dank Strains added to our Menu. Working together with impressive breeders such as Norstar Genetics and Badger's Dank, we are constantly innovating and creating new cannabis strains. We now offer 45 amazing strains of Cannabis as we continue to research and create more. Check out our extensive product menu and visit our website at SubCool.com. If you have any questions contact:
